

Corona Cherry Magic Pinks*

Dianthus x hybrida 'Corona Cherry Magic'

Plant Height: 8 inches

Flower Height: 12 inches

Spread: 12 inches

Sunlight: ☉

Hardiness Zone: 4b

Ornamental Features:

Corona Cherry Magic Pinks features beautiful fragrant shell pink frilly flowers with cherry red eyes and a dark red ring at the ends of the stems from late spring to mid summer, which are most effective when planted in groupings. The flowers are excellent for cutting. It's pointy leaves remain bluish-green in color throughout the year. The fruit is not ornamentally significant.

Landscape Attributes:

Corona Cherry Magic Pinks is an herbaceous evergreen perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This perennial will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Corona Cherry Magic Pinks is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Border Edging
- Rock/Alpine Gardens
- Container Planting

Plant Characteristics:

Corona Cherry Magic Pinks will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 12 inches. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years.
